

Motor trade

The ability to provide optional cover in addition to road risks cover within a single policy has made Chaucer the popular choice for motor trade professionals.

Delivered via our extranet, Chaucer's motor trade product offers competitive rates and versatility to construct a motor trade policy that meets the requirements of your client.

At the heart of Chaucer motor trade is our road risks product. It provides everything you would expect as standard at competitive rates, whilst also offering the benefits of wide ranging vehicle acceptance to give you extra sales flexibility.

You then have the additional advantage of being able to combine road risks with other areas of cover. All our policies are component priced, which means you can easily adjust the cover to suit the differing requirements of individual clients. For instance, you can include motorcycles, vehicles in transit and hand tools and even build in employers', public, product and sales and service liabilities.

In effect, with Chaucer you have the potential to become a one stop shop for all the business insurance needs of your motor trade clients.

Conveniently, access is via our extranet for quick quotes and online production for point of sale documentation.
